Professional Summary

Aspiring full-stack developer with experience in Next.js, and TypeScript, including live project work during a frontend internship. Skilled in building responsive web interfaces and currently learning Node.js, Express.js, and MongoDB. Seeking an opportunity to grow and gain practical experience.

Technical Skills

Frontend: React.js, Next.js, TypeScript, Tailwind CSS

Backend: Node.js, Express.js, MongoDB

Projects

Authentication System – JWT (MERN Stack) [\[Live Link\]](#)

- Developed a full-stack authentication and authorization system using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT-based authentication, refresh token mechanism, role-based access control (RBAC), and protected routes.
- Built user profile management and admin dashboard with CRUD operations for user management and secure session handling.

ATSPRO – AI Powered Resume Analyzer (Next.js + Gemini API) [\[Live Link\]](#)

- Built an AI tool that analyzes resumes against job descriptions to generate an ATS Match Score and identify missing skills.
- Integrated Gemini API to provide AI-driven suggestions and personalized resume feedback.
- Developed a responsive interface using Next.js and Tailwind CSS with modular, reusable components.

Employee Management System (CRUD) – MERN Stack

- Developed a responsive dashboard for managing employee records.
- Implemented CRUD operations with REST API integration.
- Focused on reusable components and improved user experience.

Work / Internship Experience

Frontend Development Internship – Ascendtis IT Solutions LLP *Jan 2026 – Apr 2026*

- Learned and implemented frontend development using **React component architecture**, **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Built UI for live projects and performed **API integration** to render dynamic data and enhance user experience.

MERN Stack Online Internship (2 Weeks) – CreArt Solution *Jul 2, 2025 – Jul 16, 2025*

- Built an **Employee Management System (EMS)** using the **MERN stack** to implement **CRUD** functionality.
- Gained hands-on experience in **RESTful API** integration and frontend-backend data flow.
